

Press release 2009-02-25

A true experience of Virtual Reality, previously a dream of many, is now reality.

MEEQ AB releases a new, unique PosEye® Tracker enabling users a true experience of Virtual Reality. Visitors to MEEQ AB's booth in Visual Forum in Göteborg, March 12, 2009, can for the first time truly experience moving and interacting in a virtual world.

The experience is facilitated by the PosEye® Tracker solution with measurement capability exceeding the resolution of the human eye – convincing both eyes and brain on the reality of the virtual world.

- Characteristics of the PosEye® technology eliminate fundamental drawbacks in current offerings on the market. With the PosEye® Tracker, user experience goes beyond what professional virtual reality-users have experienced for years - but at a fraction of the price of a professional high-end system, says Kennet Wahlberg, Director Business Development, MEEQ AB

The PosEye® Tracker move boundaries and set a new standard for a wide variety of applications in several segments in the industry.

At Visual Forum, MEEQ AB initiates its marketing and sales of the PosEye® Tracker on the international market.

About MEEQ

MEEQ is a leading provider of high precision tracker solutions for applications requiring accurate measurements of position and orientation. Our demanding customers represent several industrial segments with a variety of applications, e.g. docking of space crafts, robotics, automation, consistency check systems and electro-optical outlooks.

The characteristic of the PosEye® Tracker solution is unique, as it is suitable for high-end industrial solutions as well as consumer products, for example in the area of virtual reality.

MEEQ's products and solutions are based on PosEye®, a proprietary patent-protected technology.
